RESEARCH INTERESTS

Computer Vision — Machine Learning — Deep Learning — Large Language Models — Artificial Intelligence

EDUCATION

McPherson University

Oct. 2022 – July 2026

Bachelor of Science in Computer Science

CGPA: 4.53/5.0

Relevant Coursework: Data Structures & Algorithm, Operations Research, Introduction to Problem-solving, Statistics, Discrete Structures, Operating systems, Human-Computer Interaction.

EXPERIENCE

Artytech Incorporation

October, 2025 - December, 2025

METI AI/IT Internship 🔗

Tokyo, Japan

- Built a fully responsive Japanese style landing page with animations, CSS styling, and responsive mobile support.
- Developed a fully functional Vue.js website with routing, reusable components, and responsive UI.
- Assisted in an AI-based system by curating and structuring keywords, metadata, and textual resources for use in model training and recommendation workflows.
- Connected frontend components to a cloud-hosted backend (AWS Amplify) for real-time data handling.

Huawei Technologies, Nigeria

March, 2025 - August, 2025

Undergraduate Internship 🔗

Lekki, Lagos

- Collaborated with radio frequency (RF) engineers to support nationwide spectrum optimization and network quality improvement for over **30** States in Nigeria.
- Configured and optimized **30+** new and existing cellular sites under the Configuration team, improving network readiness and reliability.
- Coordinated MTN RF optimization, assigning tasks to multiple drive test engineers, validating results, and producing post-drive test reports used for executive decision-making.
- Planned and implemented **50+** neighbor relations to ensure seamless handovers, reducing dropped calls rate.

Teltwine Networks Limited

July, 2024 - October, 2024

Network Operation Centre Intern 🔗

Ajah, Lagos

- Worked in a team environment to manage and monitor **100+** client networks, also assisted in the configuration of clients' network systems, ensuring seamless and efficient internet service.
- Monitored client networks in real time, identifying and troubleshooting issues related to outages, latency and disruptions - contributing to a **90%** uptime across services..
- Coordinated with internal teams to resolve network outages swiftly, ensuring minimal downtime and high clients.

PROJECTS

Traffic Prediction Model | *Python, Machine Learning Algorithms*

June, 2024

- Built a machine learning model to predict traffic patterns using historical data, by engineered time-based features.
- Compared Linear regression, Random Forest and KNN to evaluate predictive performance.

Heart Diseases Prediction Model | *Python, Machine Learning Algorithms*

September, 2024

- Evaluated ensemble classifiers (Random Forest, LightGBM, CatBoost) on a dataset of 7,300 patients to predict the likelihood of heart disease.
- Implemented feature selection (age, cholesterol, etc.) and fine-tuned hyperparameters, achieving high accuracy on imbalanced data

Language Translation Model | *Python, Machine Learning, Neural Networks*

October, 2024

- Created a mT5 English–Yoruba machine translation model using simpleTransformer architecture.
- Evaluated performance using sacreBLEU to ensure translation accuracy and generalization across validation/test sets.

Loan Creditworthiness Prediction Model | *Python, Machine Learning Algorithms*

November, 2024

- Developed a machine learning model to assess loan creditworthiness and achieving an accuracy of **83%**.
- Developed end-to-end ML pipeline through ensemble methods and hyperparameter optimization.
- Integrated SHAP (SHapley Additive exPlanations) values to provide feature importance analysis and model transparency for stakeholder communication.

Retrieval Augmented Generation Model | *Python, Machine Learning Algorithms*

October, 2025

- Built a RAG pipeline using LangChain, FAISS, and Sentence Transformers for Nigerian Tax Law.
- Integrated Hugging face open-source LLM (Mistral-7B) to generate accurate responses grounded in the tax documents.

CONFERENCES / WORKSHOPS ATTENDED

• Rakuten Technology Conference	November, 2025
• AWS Community Builder	October, 2025
• PyCon Nigeria	October, 2025
• GITEX Africa, Nigeria	September, 2025
• The Open Source Community Africa (OSCA) Festival	August, 2025
• The Data Science Nigeria (DSN) AI Bootcamp	October, 2024

SKILLS

Programming Languages: Python, C, HTML/CSS, React.js, Vue.js, SQL
Developer Tools: VS Code, Jupyter Notebook, Google Colab, Kaggle
Technologies/Frameworks: SciPy, scikit-learn, TensorFlow, GitHub, PyTorch
Specialties: Machine Learning, Generative AI, Microsoft Azure
Soft Skills: Teamwork and Collaboration, Effective Communication, Strategic planning, Strong Analytical Ability, Problem Solving, Attentiveness to details

LEADERSHIP / EXTRACURRICULAR

DSN AI Community	November, 2024 – Present
<i>Campus Lead</i>	<i>McPherson University</i>
• Led the organization of 5+ webinars and meetups featuring top tech professionals.	
• Motivate members to actively participate in hackathons and building projects and sharing knowledge.	
• Worked with members to aim towards goals that improve and promote community service, academics, and unity.	
College of Computing	November, 2023 – February, 2024
<i>Academic Tutor</i>	<i>McPherson University</i>
• Mentored 7 junior computer science students through one-on-one guidance, leading significant improvement in their grades and confidence.	
• Assisted 4 first-year students with understanding course materials, and offering guidance on assignments.	

AWARDS & RECOGNITION

• Data Science Nigeria (DSN): First Place Winner, In-house Bootcamp Hackathon	2024
• Data Science Nigeria (DSN): Best Female Award, Bootcamp Qualification Hackathon	2024
• McPherson University: Dean’s Roll of Honor Award, x5	2024
• METI Japan AI/IT Internship: Selected as a funded attendee. (One of 50 out of 14,000 applicants)	2025
• TEDx Speaker: Selected as a speaker for TEDx McPherson University	2025
